

QUALITY MANAGEMENT POLICY STATEMENT

The Institute of Professional Engineering Technologists, referred to "IPET" hereon strives to support and represent all its members in the Engineering Fraternity in issues related to Engineering Technologists.

IPET will aim to ensure that all members will have the correct criteria to become a member and ensure all members who offer their professional services will be of a high level of quality professional service.

IPET will by way of example implement and continuously improve the effectiveness of its own internal Quality Management System through the achievement of the following goals/commitments related to this policy, namely:

1. Creating an environment through the management team which consists of volunteers in supporting the overall Vision, mission, Strategic Plans, Business Plans of the Voluntary Association.
2. Promoting registration with ECSA among its members.
3. The advancement of technologists of all engineering disciplines by representing them and promoting matters affecting them on a national and international basis.
4. Promoting the education and training of engineering technologists through liaison with the relevant educational institutions and employers and the encouragement of professional development.
5. Obtaining due recognition for engineering technologists in all spheres of society and improving public relations for them.
6. Encouragement of communication between societies with engineering technologists amongst their members and the Institute by regular liaison, consultation and other suitable means.
7. Consulting with Engineering Council of South Africa (ECSA) and providing the ECSA with information and advice affecting engineering technologists
8. Strive to ensure continuous involvement, commitment and dedication of all IPET volunteers, committees and service providers

The above commitments/goals will be achieved through ensuring that the quality objectives are established on all levels of IPET. The commitments/goals will be monitored and evaluated through the process of reviewing through Quality Survey, Strategic Plans and Business Plans of the Quality Management System of IPET and updated where required.
